It is easy to point to misuses of power in the world. But what about how WE use our power? When we talk about power we are referring to everyone's ability to have an effect or to have influence. Every day, in every interaction, we get to choose to use our power in positive ways. Together each of us can change the world for the better by committing to use our personal, status, role, and collective power in positive, life-affirming ways.
