

# ASI Peer Support 2023 Post-Pilot Survey

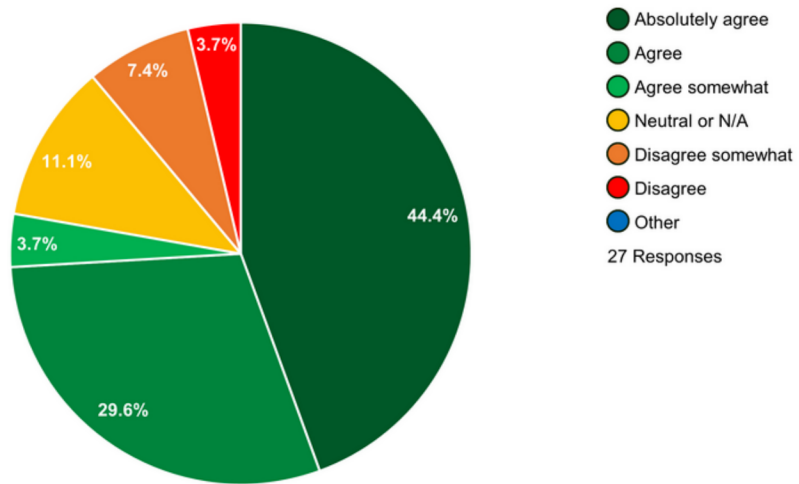

My group formed supportive relationships that were helpful for me personally.

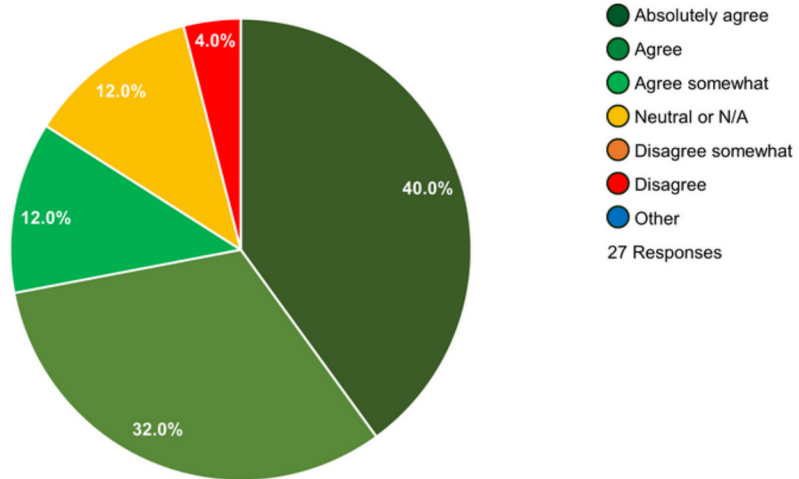

I learned important things about myself, and my strengths and challenges, from being in this group.

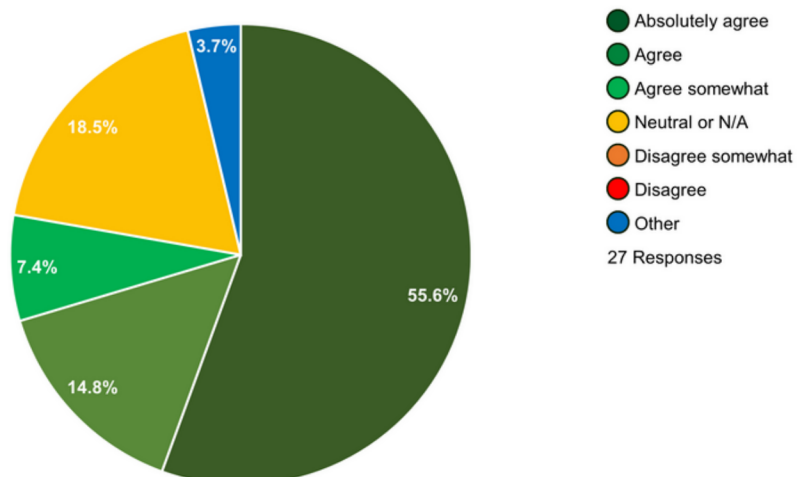

I received good support and/or advice about some very specific challenge(s) that came up for me during the months that we were meeting.

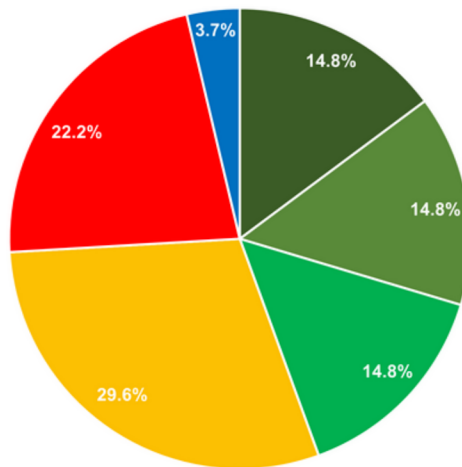

My group dropped in deeply in our authentic sharing.

I learned a lot from listening to how others in the group approached their issues and challenges.

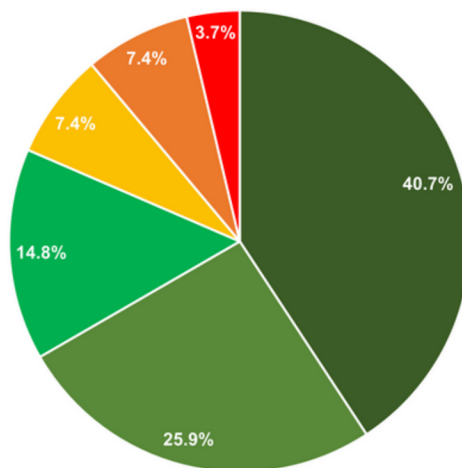

I learned useful practical tips about the business or professional side of my spiritual leadership.

I was a committed and robust participant in my group.

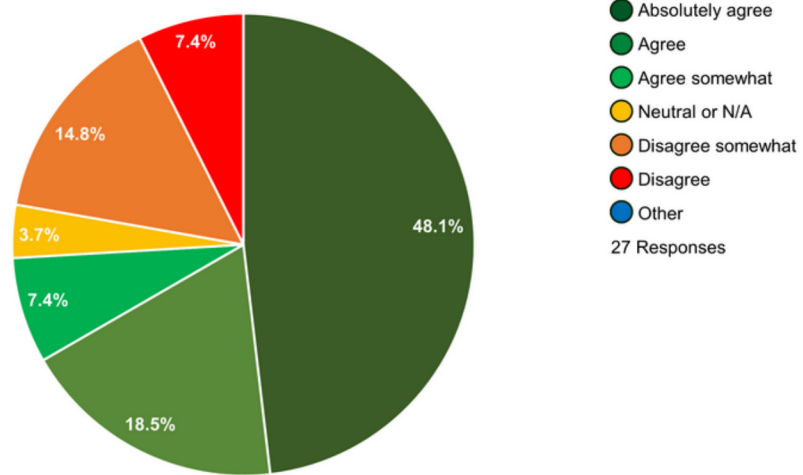

The group as a whole worked well together.

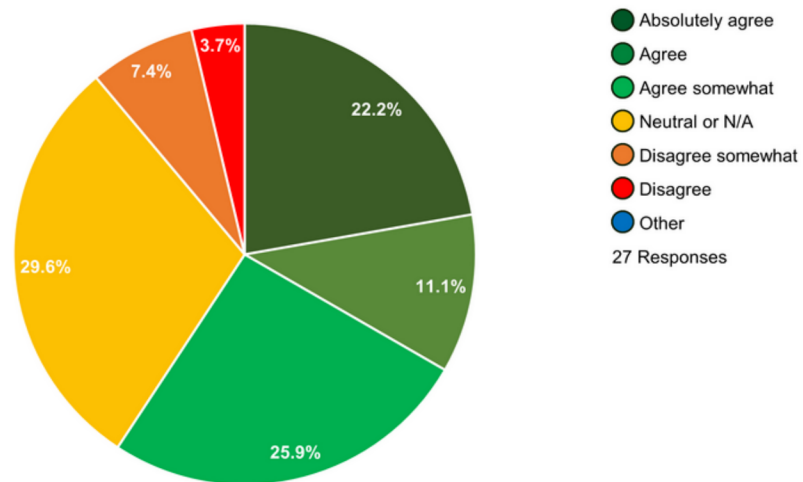

I was satisfied with the facilitator's function in my group.

The structure of the meetings (format, time, themes, etc.) worked well for me.

The online Hub was useful for me.

I would be interested in joining a similar peer support group in the future.
